

Roadmap NFT "GREEN BITCOIN"

MVP Start

Q2-2021

Installation of the first containerized PoW regenerative mining center for **Bitcoin (BTC)**.

MVP Validation

Q3-2021

First **GREEN BITCOIN** generated with energy from regenerative renewable energy sources (biogas, from organic waste).

Bitcoin Certification

Q4-2021

Validation and audit of offset CO2 emissions.

Certifier: **OCA GLOBAL**

1 BTC ⇒ -94.11 Tn CO2

NFT
Chaingea

GDC Collection

Q1-2022

Design of the NFT using an **artistic watercolor technique** and commemorative digitization of the world's first mined Bitcoin with a balance of negative CO2 emissions, by the artist "Slumil".

Airdrop 1 - NCB

Q2-2022

First "Airdrop" of 94.11 **NCB (Negative Carbon Balance)** tokens, representing the tokenized and guarded emission right of 1 Tn/CO2 for each NCB token listed.

Airdrop 2

Q2-2022

Second "Airdrop" of the first **GREEN BITCOIN (BTC)** in history, mined with a **negative balance of CO2 emissions**, equivalent to planting **565 new trees**.

Airdrop 3

Q2-2022

Third "Airdrop" corresponding to 2.00% of the sale of all "GREEN BITCOIN" NFTs, in a perpetual income, generated by a tokenized fund of **DEFI** assets.
